Spring 2016 - EHS Training – Updated 1/15/2016

The following is the 2016 Spring training schedule for the department of Environmental Health and Safety (EHS). If you have any questions, please email us at healthandsafety@njit.edu or call us at (973) 596-3059. Additional information is available at www.njit.edu/environmentalsafety. Please note that there is limited seating at each training session. People will be admitted on a first-come, first-serve basis. Doors will be closed at the start of training and people will not be allowed to attend partial sessions.

Lab Safety Training:
Lab safety training takes approximately 2 hours to complete and is intended for new and returning students, faculty and staff who will be working (or taking classes) in NJIT labs and have not previously attended lab safety training. *Note: employee or student researchers who are handling chemicals must also attend annual Hazard Communication (HazCom) training which is covered during the first hour of Lab Safety Training.*

Day	Date	Time	Location
Friday	1/22	11:30 am – 1:00 pm	CKB room 303
Wednesday	1/27	2:30 pm – 5:00 pm	CKB room 303
Wednesday	2/3	3:00 pm – 5:30 pm	CKB room 303

Additional sessions (including evenings) will be made available upon request.

Laser Safety Training:
Laser safety training takes approximately 1 hour to complete and is intended for students, faculty and staff who will be working with lasers and have not previously attended laser safety training. Attendees should also attend Lab Safety Training (see above).

Day	Date	Time	Location
Friday	1/29	12:15 pm – 1:00 pm	CKB room 303

Additional sessions (including evenings) will be made available upon request.

BBP Training:
This training provides a review of bloodborne pathogen exposure control principles, practices, and requirements as required by the Occupational Safety and Health Administration (OSHA) Bloodborne Pathogens Standard. This training is required for all personnel who work with human blood or blood products or human tissues, fluids, or cells. Please review the following questions to determine if you are required to take this training:

DO YOU
•handle human blood products, or human body fluids?
•work with animals?
•handle unfixed human tissue, organs, or primary cell strains?
•work with hepatitis B virus or other blood borne diseases?
•handle sharp instruments such as knives, needles, scalpels, or scissors which have been used by others working with human blood or other potentially infectious materials?
•enter areas where other individuals work with human or animal blood, body fluid, tissues or organs?
•perform tasks which may potentially result in skin or mucous membranes coming in contact with human or animal blood, body fluids, organs, or tissues?

If your answer was YES to any of these questions, then you are required to take the blood borne pathogens training.

Day	Date	Time	Location
Friday	1/29	11:30 am – 12:15 pm	CKB room 303
Wednesday	2/3	2:30 pm – 3:30 pm	CKB room 303

Additional sessions (including evenings) will be made available upon request.

Radiation Safety Training:
Radiation safety training takes approximately 1 hour to complete and is intended for students, faculty and staff who will be working with ionizing radiation generating equipment, sealed sources or loose material of ionizing radiation (X-ray machines, Ni63, etc). Attendees should also attend Lab Safety Training (see above).

Day	Date	Time	Location
TBD	TBD	TBD	TBD

Additional sessions (including evenings) will be made available upon request.

Hazard Communication (HazCom) Training:
Also known as NJ right-to-know training. The Occupational Safety & Health Administration mandate 29 CFR 1910.1200, states that organizations producing and using *hazardous materials* must provide employees with information and training on the proper handling and use of these materials. This training is covered during the first hour of Lab Safety Training (see above).
