## DAPL Fast Facts

### What is it?

The Dakota Access Pipeline Project is a 1,772-mile conduit that would carry 470,000 barrels of oil a day from the oil fields of western North Dakota to Illinois. It would stretch through four states and cross three major rivers.

### Why is it being protested?

A potential pipeline spill would be devastating to the Missouri River, as well as the active farmland and forests it goes through. Native American groups are also protesting because the pipeline would disturb sacred sites, infringing on past land treaties and violating tribal sovereignty.
